

Exam : General Human Anatomy & Physiology -I_BVOC_MLT_29JAN_PM

1. What is the primary function of red blood cells?

- A. Oxygen transport**
- B. Immune response
- C. Blood clotting
- D. Digestion

2. Which part of the brain is responsible for regulating heartbeat and breathing?

- A. Cerebellum
- B. Medulla oblongata**
- C. Cerebrum
- D. Thalamus

3. What is the largest organ in the human body?

- A. Heart
- B. Liver
- C. Skin**
- D. Kidney

4. Which of the following is part of the human circulatory system?

- A. Lungs
- B. Stomach
- C. Heart**
- D. Brain

5. What is the main function of the mitochondria in human cells?

- A. Protein synthesis
- B. ATP production**
- C. DNA replication
- D. Oxygen absorption

6. What is the basic structural and functional unit of the human body?

- A. Tissue
- B. Cell**
- C. Organ
- D. Organism

7. Which organ is responsible for filtering blood in the human body?

- A. Heart
- B. Liver
- C. Kidneys**
- D. Lungs

8. How many chambers does the human heart have?

- A. 2
- B. 4**
- C. 6
- D. 8

9. Which blood vessel carries oxygenated blood from the lungs to the heart?

- A. Pulmonary artery**
- B. Aorta
- C. Pulmonary veins ✓
- D. Vena cava

10. What is the main function of the lymphatic system?

- A. Oxygen transport
- B. Hormone regulation**
- C. Immunity ✓
- D. Digestion

11. Which of the following is a part of the peripheral nervous system?

- A. Brain
- B. Spinal cord**
- C. Nerves ✓
- D. Cerebellum

12. The digestive enzyme amylase is produced by which organ?

- A. Stomach
- B. Liver

C. Pancreas

D. Salivary glands

13. Which structure connects muscles to bones?

A. Ligaments

B. Tendons

C. Cartilage

D. Joints

14. What is the role of the hypothalamus in the human body?

A. Digestion

B. Hormonal control

C. Memory

D. Movement

15. The bones in the human body are primarily made of what type of tissue?

A. Muscle tissue

B. Bone tissue 

C. Nerve tissue

D. Cartilage

16. Which part of the body is responsible for producing insulin?

A. Liver

B. Pancreas 

C. Stomach

D. Small intestine

17. What type of joint is found in the human shoulder?

A. Hinge

B. Pivot

C. Ball-and-socket

D. Gliding

18. Which part of the nervous system is responsible for the "fight or flight" response?

A. Parasympathetic

B. Sympathetic

C. Central

D. Somatic

19. What is the function of the myelin sheath in the nervous system?

A. Nutrient transport

B. Electrical insulation

C. Synapse formation

D. Muscle contraction

20. The major function of the large intestine is to:

A. Digest food

B. Absorb nutrients

C. Absorb water

D. Secrete enzymes

21. The smallest bone in the human body is found in which part of the body?

A. Foot

B. Ear

C. Hand

D. Skull

22. What is the primary function of the respiratory system?

A. Circulate blood

B. Digest food

C. Exchange gases

D. Produce hormones

23. Which of the following is a function of the liver?

A. Digestion

B. Hormone regulation

C. Detoxification 

D. Blood clotting

24. What is the function of the rib cage?

A. Protection

B. Movement

C. Digestion

D. Respiration

25. What is the purpose of the sarcoplasmic reticulum in muscle cells?

A. Protein synthesis

B. Calcium storage

C. Oxygen supply

D. Energy production

26. Which of the following hormones is responsible for regulating the menstrual cycle?

- A. Testosterone
- C. Insulin

- B. Estrogen**
- D. Adrenaline

27. Which organ is responsible for the majority of nutrient absorption during digestion?

- A. Large intestine

- B. Stomach

- C. Small intestine**

- D. Liver

28. What is the function of the alveoli in the lungs?

- A. Air filtration
- C. Blood circulation

- B. Gas exchange**
- D. Oxygen production

29. What type of muscle tissue is responsible for voluntary movements in the human body?

- A. Smooth

- B. Cardiac

- C. Skeletal**

- D. Epithelial

30. Which of the following structures is responsible for maintaining the blood-brain barrier?

- A. Neurons
- C. Glial cells

- B. Endothelial cells**
- D. Astrocytes

31.

Explain the structure and function of the human circulatory system.

[LM6226_891_58_2025-01-28_Image_to_PDF_20250129_14_41_24_2.jpg](#)

32.

Describe the process of muscle contraction at the cellular level.

[LM6226_892_58_2025-01-28_Image_to_PDF_20250129_14_41_24_1.jpg](#)

33.

Discuss the structure and function of the human digestive system.

[LM6226_893_58_2025-01-28_Image_to_PDF_20250129_14_41_24_4.jpg](#)

34.

Explain the functions of the nervous system and differentiate between the central and peripheral nervous systems.
